## How to play:

Use the program that came in your buy-in packet to make sure you are playing the correct bingo card (paper or strip). A caller then calls out random numbers. If the number called is present on your card, you daub it off. To win most games you must fill numbers in a row, either vertically, horizontally, or diagonally. Use this guide to get a preview of our main games and how to play them.

# 1

Come early so you have time to prep your games. Pull the tops off your strip games and tape multiple strips in a row. Use our program to keep track of what's up next. Stamp free spots in advanced.

# 2

We play extra pull tab games that feature "Flash", Down Line & Last Ball in addition to our main program. Visit our flash stand or call one of our runners to purchase. Check out our "How to play pull tab games" section inside.

# 3

Each game has it's own pattern of "Bingo" to win. Use our handy guide inside so you don't miss your opportunity to win!!

# How To Play Pull Tab Games

These games can be purchased from our flash stand or from one of our flash runners walking around with the carts. Call out "Flash" when they are near. These extra games are played in between our main games and the caller will let you know which tab game is live. When you buy a pull tab, open it and check if you have a card that has numbers and is eligible to play. The first goal is to open flash that give you a chance to win big! There are two main types of tab games we offer.

- 1. Flash style games** let you mark the numbers on your card when they are called. If bingo is called before the down line is completed, the caller will continue to call numbers (in rapid succession) until the flash game has a winner. If you have any questions make sure to ask our friendly staff. They are always happy to help!
- 2. Down Line and Last Ball** games. At Vanguard Bingo our "Last Ball" games are played as part of our regular games. Our winning "Last Ball" is the number that BINGO was won with. NOT the last ball in a Down Line.

**What is a Down Line you ask?** It is going to be a number from 1-15 and is determined by which vertical column on the flash board gets filled first (i.e. 1, 16, 31, 46, 61). If bingo is called before a flash game is completed, the caller will continue to call numbers until the down line is completed.

**The Down Line wining number will always be 1-15**

"1" is the wining Down Line because the row containing 16, 31, 46 and 61 was filled first
